

## Web, Mobile and Cloud Computing - Lab 1

Team 6:

Name: Avinash, Banala

Class Id: 2

Name: Pranoop, Mutha

Class Id: 19

### Objective:

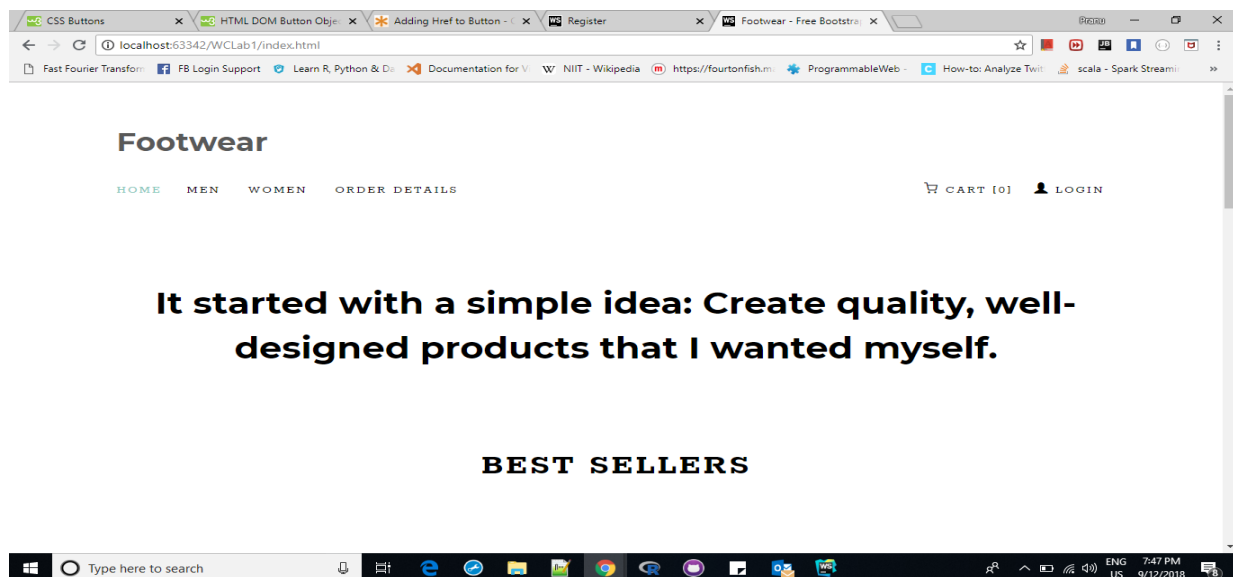

We need to design an e-commerce web application where it has several components like Login, Registration, Men and Women products, Contact Details, Recent Orders etc.

#### Multi-Page Responsive Website: *e-commerce web application*

1. Create an e-commerce web application which will render below details in different web pages
  - User Account details (Logged in user, Guest user)
  - Order details (Recent Orders, Old Orders)
  - Products Details (e.g. Clothing, Shoes, jewelry etc.)
  - Create individual pages for subcategories (e.g. Women, Men, Girls, Boys, Baby etc.)
  - Include appropriate images for product details where ever required
2. Don't restrict yourself to given description, you can enhance web application with the creativity. However, you must use all the elements that we have discussed in the class
3. Use appropriate CSS for styling. Make the pages and images responsive. (Check its responsiveness for different screen sizes.)

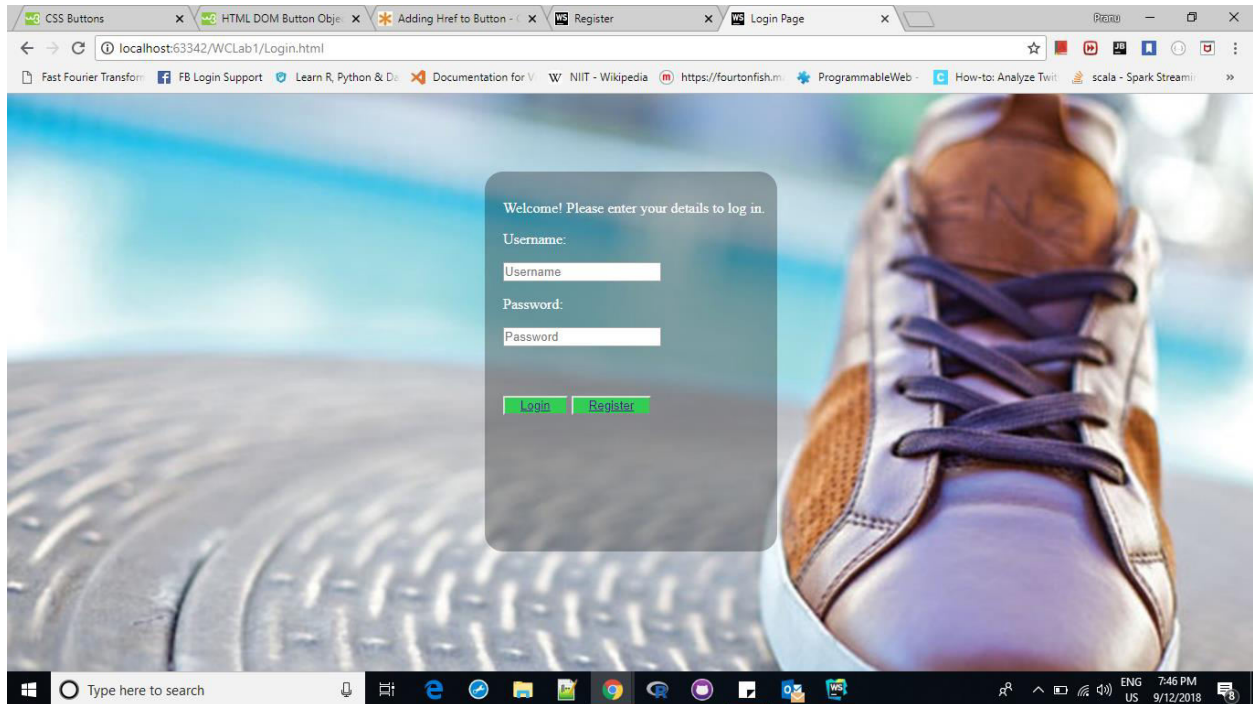

### Index Page:

Once you run the application, the first page that pops up is the index page, which looks like this

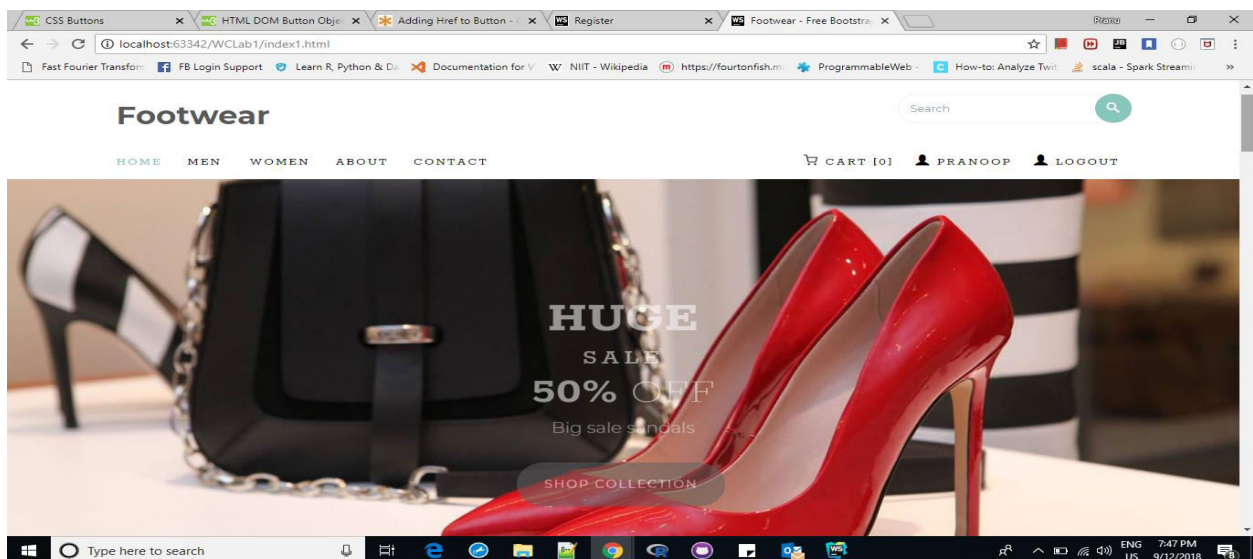

## Login Page:

We have Login option to the top right corner of the index page. Once you click on Login, it directs you to the Login Page. It looks as below:

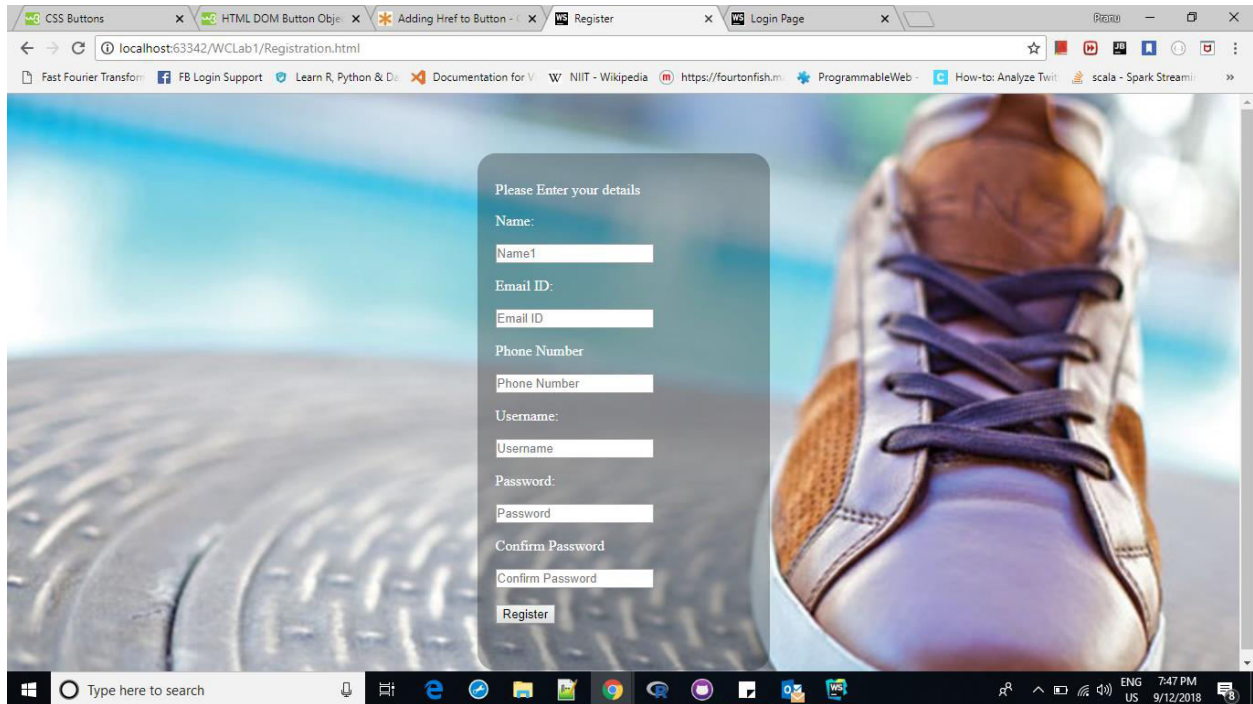

## Main Page:

Once you give your correct user name and password, then click Login. It gets logged in and directs to the main page. It looks as below:

## Registration Page:

If at all you don't have an account, you can hit the register button, which directs to the registration page. The user can provide their details and then get logged into the website.

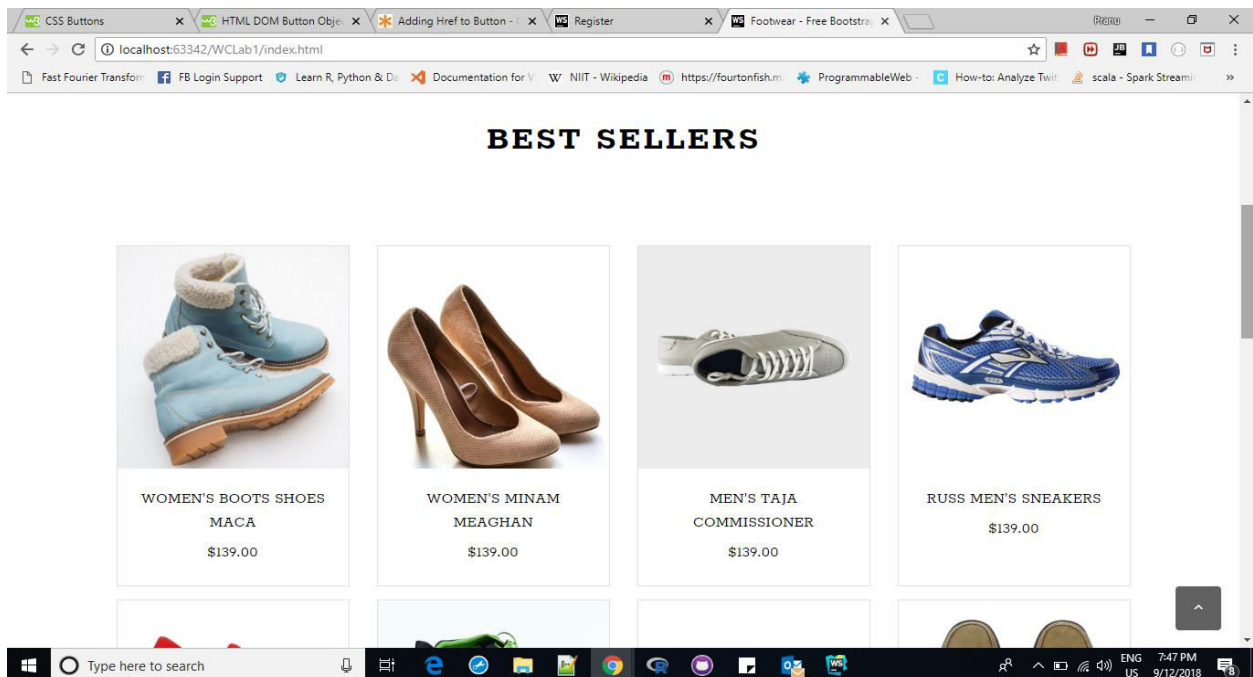

The screenshot shows a web browser window with the URL `localhost:63342/WCLab1/Registration.html`. The page features a registration form titled "Please Enter your details" overlaid on a background image of a brown leather shoe. The form includes the following fields and a button:

- Name:
- Email ID:
- Phone Number:
- Username:
- Password:
- Confirm Password:
- 

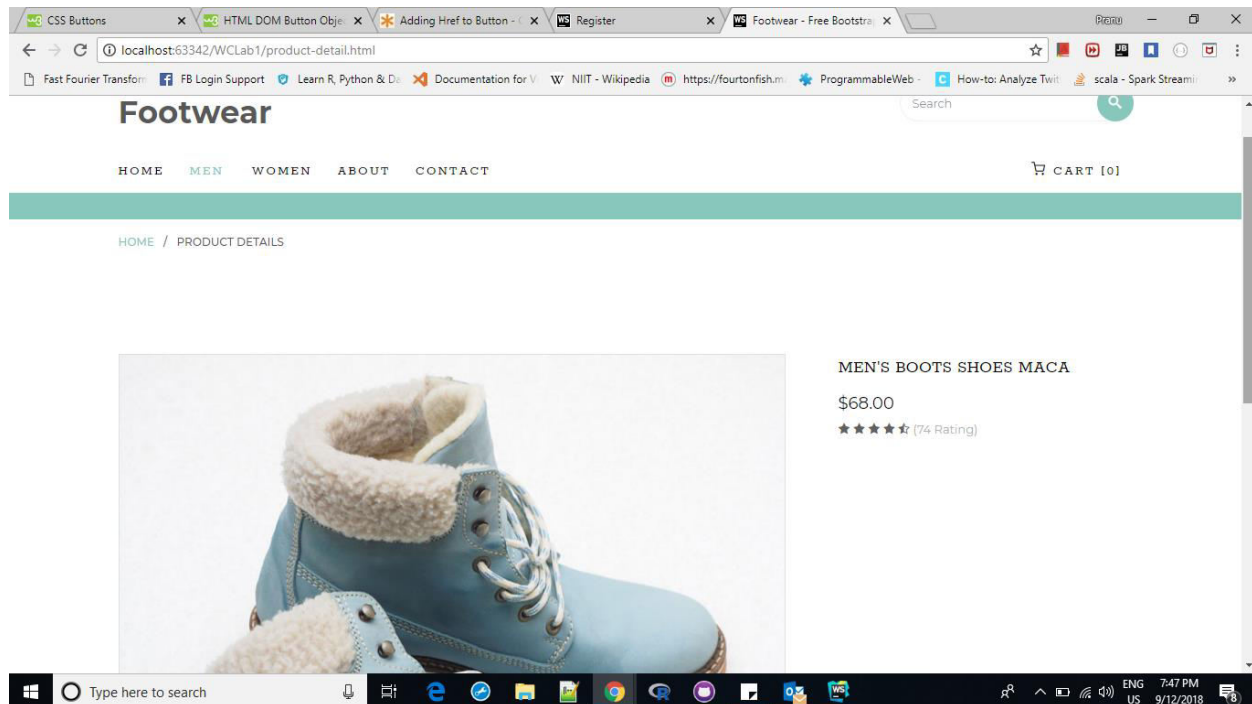

The browser's taskbar at the bottom shows the Windows logo, a search bar, and various application icons. The system clock indicates 7:47 PM on 9/12/2018.

Once you logged in, you will be directed to the main page. If you scroll down a bit on the main page, you can see several products available in the website, in which some of them are popular or trending etc.

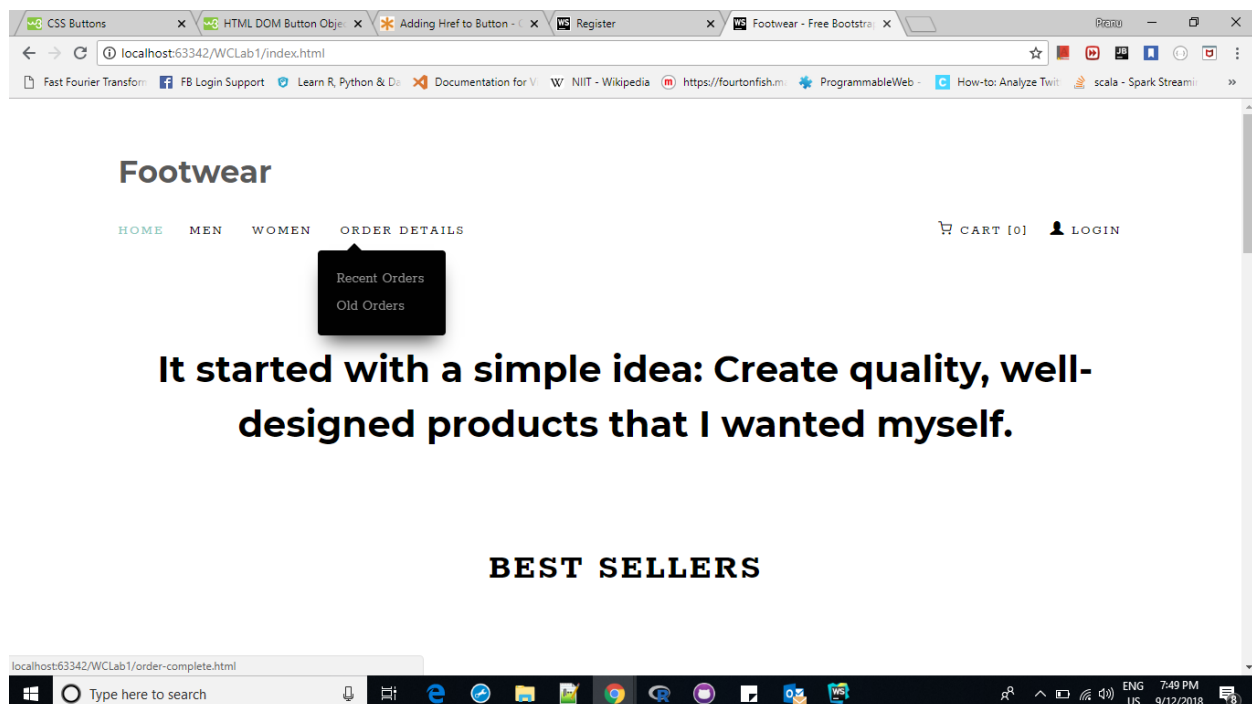

## Men's Products:

Suppose, if you want to see only Men's footwear in the website, you can scroll to Men in the navigation bar beside Home. Once you click it, it navigates you to Men's products.

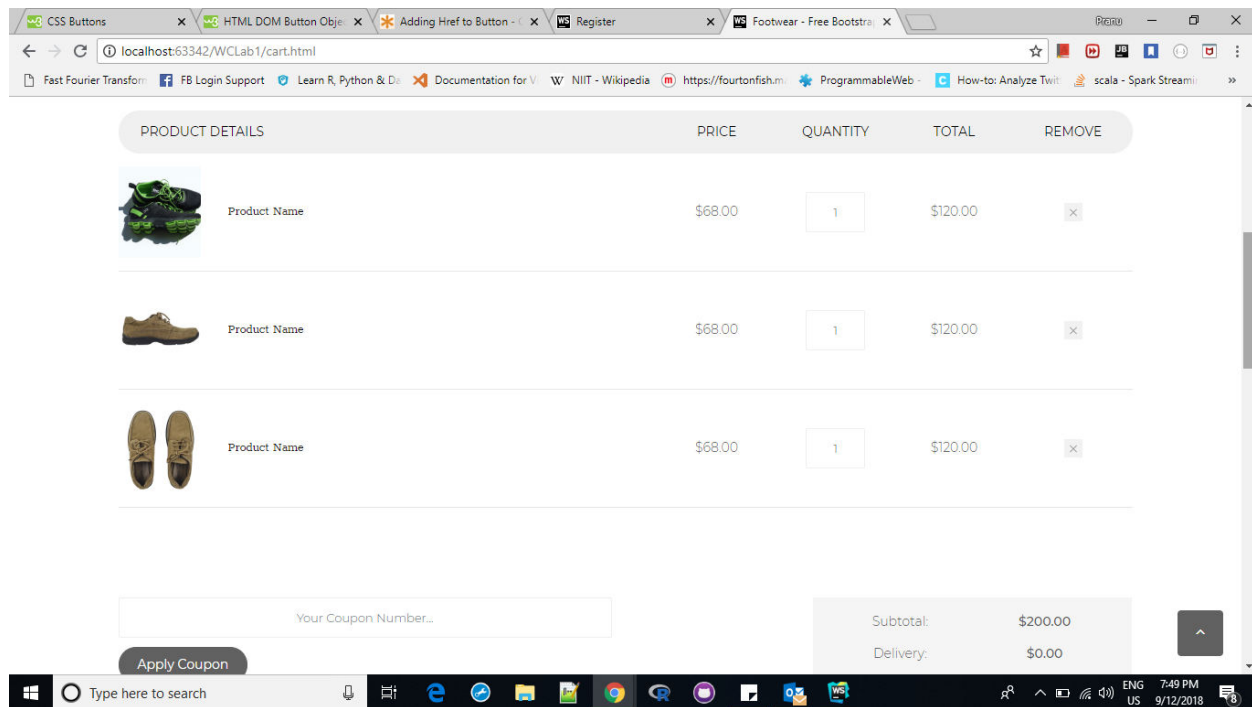

## Order Details Page:

Another feature is the order details. Once you click the Order Details option. It looks like this:

## Contact:

We also have an option of contact details for the customer service.
